PROFESSIONAL SUMMARY

Flutter developer with 2.3+ years of experience shipping production cross-platform apps across social, chat, and mobility products, built on 4.5+ years of native Android/Kotlin experience. Independently led an end-to-end Kotlin-to-Flutter migration for SocialEngine Mobile — rebuilding UI, navigation, and state management — and shipped it to both Google Play (Android) and the App Store (iOS) with full feature parity.

TECHNICAL SKILLS

Flutter & Dart: Flutter SDK (Android & iOS), Dart, State Management (Provider, Riverpod, BLoC), Flutter Test, Unit Testing, Widget Testing, Mocktail

Native Android: Kotlin, Android SDK, Jetpack Compose, Coroutines, ViewModel, Deep Linking, WebView, Custom Chrome Tabs

Architecture: MVVM, Clean Architecture, Repository Pattern, Dependency Injection (GetIt)

Backend & Cloud: REST API Integration, Firebase (Auth, Realtime Database, FCM), WebSockets, Crashlytics, Analytics

Integrations: Google Maps SDK, Real-Time Location Tracking, Stripe & Wallet Payments, Push Notifications, Localization, AdMob, Google/Facebook login

Process & Deployment: Agile/Scrum, JIRA, Git, Gradle, Play Console, App Store Connect (iOS releases), CI/CD (GitHub Actions)

PROFESSIONAL EXPERIENCE

Flutter & Android Developer | Ahead Websoft Technologies Pvt. Ltd.

Jul 2025 – Present | Gurgaon, India

SocialEngine Mobile App – Flutter, Dart, Firebase, REST APIs, MVVM, Provider, Riverpod [Play Store](#) · [App Store](#)

- Led the native Android (Kotlin) to Flutter migration end-to-end — rebuilt UI, navigation, and state management (Provider, Riverpod) with full feature parity; the app holds **1,000+ downloads and a 4.3-star rating across 54 reviews**.
- Reduced regression risk with unit testing and widget testing (Flutter Test, Mocktail); shipped the Flutter build to Google Play and the App Store (Android & iOS) from a single codebase, maintaining feature parity across platforms.

SocialEngine Chat – Flutter, Dart, Firebase, REST APIs, GetIt, MVVM [Play Store](#) · [App Store](#)

- Built and shipped a real-time chat app (MVVM) for 1:1 and group messaging across **5 content types** — text, photo, video, file, and contact — with upload/download progress, read receipts, typing indicators, and paginated message history; released on Google Play and the App Store.
- Applied GetIt-based dependency injection for testability and clean layer separation; integrated REST APIs and Firebase for authentication and push notifications, with deep links opening the relevant chat and automatic login when launched from the SocialEngine app.

ClubDunes – Android (Kotlin), Firebase Realtime Database, MVVM, Coroutines [Play Store](#)

- Built a Dubai-based sports and events community app on Firebase Realtime Database, restructuring queries to keep feeds and event listings responsive under concurrent reads/writes; sustains **100+ downloads and a 5.0-star rating** on Google Play.
- Implemented the sports and event booking module, including event listings, join/RSVP flows, and member profiles.
- Added deep linking and embedded WebView content for seamless in-app navigation; implemented Custom Chrome Tabs for Stripe payment flows.

Flutter & Android Developer | I-Next Web Technologies Pvt. Ltd.

May 2024 – Jul 2025 | Chandigarh, India

GreenRide Africa – Ride-Hailing & Mobility App – Flutter, Dart, REST APIs, Google Maps, Real-Time Tracking [Play Store](#) · [App Store](#)

- Scaled a cross-platform Flutter ride-hailing app to **5,000+ downloads** — built pickup/destination selection, upfront fare estimation, live driver tracking, and Google Maps-based ETA monitoring.
- Delivered REST API-driven auth, booking, pricing, and trip management, plus trip-sharing safety features, **flexible payments — riders can pay by cash or mobile money (MTN, Airtel)** — and localization in English, French, and Kinyarwanda.

HappyTask – Service Booking Platform – Android (Kotlin), WebSockets, REST APIs, Deep Linking [Play Store](#)

- Cut booking completion time by 40%** by redesigning the booking UI flow and optimizing API pipelines across 15+ service categories.
- Cut notification latency by 90%** by replacing polling with a WebSocket-based push system; added deep linking for third-party navigation into the app.

BaOui – Language Learning Platform – Android (Kotlin), Firebase [Play Store](#)

- Grew the app to **1,000+ downloads across 30+ languages**, shipping listening, reading, and review/recall practice modules.
- Used Firebase for dynamic content delivery, enabling curriculum updates without shipping a new app release.

Android App Developer | I-Exceed Technology Solutions Pvt. Ltd.

Feb 2022 – Jan 2024 | Bengaluru, India

Appzillon – Microservices Banking Platform – Android (Kotlin), Appzillon Framework, Firebase

- Developed and delivered Android feature modules across Local, UAT, and Production environments within Agile sprints, collaborating with designers, product managers, QA, and backend teams.
- Implemented push notifications, WebView, AdMob, theme switching, collapsing toolbar, Google Maps SDK, and Custom Chrome Tabs, supporting multiple application workflows.
- Resolved 30+ UAT and production defects**, improving application stability, release quality, and overall user experience.

EDUCATION

B.Tech, Information Technology – Ajay Kumar Garg Engineering College, Ghaziabad

Aug 2017 – Sep 2021

CERTIFICATIONS & ACHIEVEMENTS

- Introduction to Flutter, Simplilearn
- Kotlin Masterclass 2023, Udemy
- Android Dev Masterclass (Java), Udemy
- 5-Star Core Java Rating, HackerRank
