

ABHISHEK KUMAR

Flutter Developer | Flutter & Android | Mobile Application Developer | 8+ Apps Delivered

adoxyAKD@gmail.com | +91 8933854370 | Gurgaon, India | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Mobile Application Developer with **4.2+ years** of experience across Flutter/Dart and native Android (Kotlin), including **1.1+ years** in production Flutter development. Led a full native-to-Flutter migration of a live social networking app, rebuilding its UI, navigation, and business logic while shipping to both Google Play and the Apple App Store. Proficient in RESTful API integration, Firebase (Auth, Firestore, FCM, Crashlytics), MVVM/Clean Architecture, dependency injection, and unit/widget testing, backed by a strong Android foundation in background processing, WorkManager, and CI/CD-driven production releases.

TECHNICAL SKILLS

Languages	Kotlin, Java, Dart
Mobile Development	Flutter, Android SDK, Material 3, XML/ViewBinding
Flutter	Provider, Riverpod, Bloc/Cubit, GetX, GetIt, Navigation, Platform Channels, Null Safety, REST API Integration, Responsive UI, Custom Widgets, Async Programming
Android	ViewModel, LiveData, StateFlow, Coroutines, Flow, Retrofit, OkHttp, WorkManager, Foreground Service, Deep Linking
Architecture & Patterns	MVVM, Clean Architecture, Repository Pattern, Dependency Injection (Hilt, GetIt), SOLID, OOP
Backend & Cloud	REST APIs, Firebase (Auth, Firestore, Realtime DB, FCM, Crashlytics, Analytics), WebSockets/Socket.IO
Testing & Tools	JUnit, Espresso, Flutter Test, Mocktail, Git, CI/CD (GitHub Actions), Postman, JIRA, Figma
Deployment	Play Console, App Store Connect, Gradle, Google Play Billing, AdMob

PROFESSIONAL EXPERIENCE

Flutter & Android Developer — Ahead Websoft Technologies Pvt. Ltd

Jul 2025 – Present

Gurgaon, India

KEY PROJECTS

Social Engine App — Native-to-Flutter Migration | Flutter, Dart, Firebase, REST APIs, MVVM

[Play Store](#) · [App Store](#)

- Migrated Social Engine from native Android (Kotlin) to Flutter, independently rearchitecting the codebase for cross-platform scalability.
- Rebuilt UI, navigation, and state management (Provider, Riverpod) while preserving full feature parity, including activity feeds and real-time engagement modules.
- Integrated REST APIs and Firebase services; authored unit/widget tests (Flutter Test, Mocktail) for core business logic.
- Published the Flutter-based iOS build to the App Store alongside the native Android release, which originally scaled to 100+ active users.

CircuitChat — Flutter Application | Ongoing | Flutter, Dart, Firebase, REST APIs, WebSockets/Socket.IO, GetIt, MVVM, Clean Architecture

- Building a real-time chat application in Flutter/Dart using MVVM and Clean Architecture.
- Integrating REST APIs and Firebase for authentication, profile management, and push notifications.
- Implementing real-time messaging via WebSockets/Socket.IO with GetIt-based dependency injection.

Clubdunes App | Android (Kotlin), Firebase Realtime Database, MVVM, Coroutines

[Play Store](#)

- Shipped a community-based social networking app serving 100+ users, built with MVVM and Coroutines.
- Implemented real-time posts, comments, and interaction flows on Firebase Realtime Database.

Android App Developer — I-Next Web Technologies Pvt. Ltd

May 2024 – Jul 2025

Chandigarh, India

KEY PROJECTS

HappyTask App — Service Booking Platform | Android (Kotlin), WebSockets, REST APIs, Deep Linking

[Play Store](#)

- Architected HappyTask, a service booking platform spanning 15+ categories, live on the Play Store.
- Cut booking completion time by 40% through optimized API pipelines and a redesigned UI flow.
- Built a WebSocket-based notification system reducing alert latency by 90% vs. polling, plus a deep linking layer for third-party navigation.

BaOui App — Language Learning Platform | *Android (Kotlin), Firebase*

[Play Store](#)

- Launched a multilingual learning app with 1,000+ active users across 30+ languages, featuring listening, reading, and spaced-repetition modules.
- Integrated Firebase for dynamic content delivery, enabling curriculum updates without app releases.

Android App Developer — I-Exceed Technology Solutions Pvt. Ltd

Feb 2022 – Jan 2024

Bengaluru, Karnataka, India

KEY PROJECTS

Appzillon App — Microservices Banking Platform | *Android (Kotlin), Appzillon Framework, Firebase*

- Delivered modules for a microservices banking platform across Local, UAT, and production with minimal defect leakage, collaborating with designers, PMs, and QA in Agile sprints.
- Implemented push notifications, AdMob monetization, and real-time light/dark theme switching; built a collapsing toolbar with scroll-linked animation and localization.
- Integrated Google Maps SDK and Custom Chrome Tabs/WebView; configured Play Console internal testing for streamlined QA.

EDUCATION

B.Tech – Information Technology | 70.63%

Ajay Kumar Garg Engineering College, Ghaziabad — Aug 2017 – Sep 2021

Intermediate | 72.20%

National Institute of Open School, Gorakhpur — Jul 2016 – Jul 2017

SSC | 85.50%

RAMPUS, Gorakhpur — Jul 2013 – Jul 2014

CERTIFICATIONS

- Flutter Development Certification — [View Certificate](#)
- Kotlin Development Masterclass 2023 — Udemy — [View Certificate](#)
- Android App Development Masterclass (Java) — Udemy — [View Certificate](#)

ACHIEVEMENTS

- Attained a 5-star rating on HackerRank in Core Java.
