KEY PROJECTS

Social Engine App — Native-to-Flutter Migration | Flutter, Dart, Firebase, REST APIs, MVVM

[Play Store](#) · [App Store](#)

- Led the independent migration of Social Engine from native Android (Kotlin) to Flutter, rearchitecting the codebase for cross-platform scalability and eliminating the need for separate Android/iOS codebases going forward.
- Rebuilt UI, navigation, and state management (Provider, Riverpod) while preserving full feature parity, including activity feeds and real-time engagement modules.
- Integrated REST APIs and Firebase services; authored unit/widget tests (Flutter Test, Mocktail) for core business logic, reducing regression risk across releases.
- Published the Flutter-based iOS build to the App Store alongside the native Android release (100+ active users).

Clubdunes App | Android (Kotlin), Firebase Realtime Database, MVVM, Coroutines

[Play Store](#)

- Shipped a community-based social networking app serving 100+ users, built with MVVM and Coroutines.
- Implemented real-time posts, comments, and interaction flows on Firebase Realtime Database, enabling live engagement across the user feed.
- Handled concurrent read/write operations to keep the feed responsive under live data updates.
- Implemented deep linking for direct in-app navigation and integrated WebView for embedded content.

CircuitChat — Flutter Application | Ongoing | Flutter, Dart, Firebase, REST APIs, WebSockets/Socket.IO, GetIt, MVVM, Clean Architecture

- Building a real-time chat application in Flutter/Dart using MVVM and Clean Architecture.
- Integrating REST APIs and Firebase for authentication, profile management, and push notifications.
- Implementing real-time messaging via WebSockets/Socket.IO with GetIt-based dependency injection.
- Structuring the codebase for testability and long-term scalability as the app grows.

Flutter & Android Developer — I-Next Web Technologies Pvt. Ltd | Chandigarh, India May 2024 – Jul 2025

KEY PROJECTS

GreenRide Africa — Ride-Hailing & Mobility Application | Flutter, Dart, REST APIs, Google Maps/Map Integration, Firebase, WebSockets/Real-Time Tracking, State Management, Local Storage

[Play Store](#) · [App Store](#)

- Developed and maintained a cross-platform ride-hailing app in Flutter/Dart, covering pickup/destination selection, fare estimation, ride confirmation, and real-time trip status.
- Integrated map-based location services and real-time driver tracking so passengers could monitor driver movement and ETA.
- Implemented REST API integrations for authentication, user profiles, ride booking, pricing, and trip management.
- Built safety features including trip sharing and quick access to in-app support.
- Integrated payment/wallet functionality (including mobile money support) and multilingual support for English, French, and Kinyarwanda.

HappyTask App — Service Booking Platform | *Android (Kotlin), WebSockets, REST APIs, Deep Linking*

[Play Store](#)

- Architected HappyTask, a service booking platform spanning 15+ categories, live on the Play Store.
- Cut booking completion time by 40% through optimized API pipelines and a redesigned UI flow.
- Built a WebSocket-based notification system, reducing alert latency by 90% vs. polling.
- Developed a deep linking layer enabling seamless third-party navigation into the app.

BaOui App — Language Learning Platform | *Android (Kotlin), Firebase*

[Play Store](#)

- Launched a multilingual learning app with 1,000+ active users across 30+ languages.
- Built listening, reading, and spaced-repetition learning modules.
- Integrated Firebase for dynamic content delivery, enabling curriculum updates without requiring app releases.

Android App Developer — I-Exceed Technology Solutions Pvt. Ltd | *Bengaluru, India*

Feb 2022 – Jan 2024

KEY PROJECTS

Appzillon App — Microservices Banking Platform | *Android (Kotlin), Appzillon Framework, Firebase*

- Delivered modules for a microservices banking platform across Local, UAT, and production environments with minimal defect leakage.
- Collaborated with designers, PMs, and QA in Agile sprints to ship features on schedule.
- Implemented push notifications, AdMob monetization, and real-time light/dark theme switching.
- Built a collapsing toolbar with scroll-linked animation; integrated Google Maps SDK and Custom Chrome Tabs/WebView.
