PROFESSIONAL SUMMARY

Android developer with **4.5+ years** shipping production apps across social, fintech, ride-hailing, and service booking.

Native Android specialist (Kotlin, Compose, MVVM, Hilt, Coroutines/Flow) who also ships **Flutter** apps to both stores.

Independently migrated a Kotlin app to **Flutter**; shipped apps up to **5,000+ downloads**; mentored **2 junior developers**.

TECHNICAL SKILLS

Languages & CS:	Kotlin, Java, Dart, Data Structures, OOP
Android Development:	Android SDK, Jetpack Compose, XML/ViewBinding, Navigation, Paging 3
Android Components:	ExoPlayer, Glide, WebView, Deep Linking, Push Notifications (FCM)
Architecture & Concurrency:	MVVM, Clean Architecture, Modularization, Coroutines, Flow/StateFlow, DI (Hilt, GetIt)
Networking & Integrations:	REST APIs, Retrofit/OkHttp, WebSockets, Firebase, Google Sign-In, Google Maps, Stripe
Testing & Debugging:	JUnit, Espresso, Flutter Test, Mocktail, Firebase Crashlytics, Firebase Analytics
Flutter / Cross-Platform:	Flutter, Kotlin-to-Flutter migration, Android and iOS publishing
Tools & Release:	Git, GitHub Actions CI/CD, Gradle, ProGuard/R8, Play Console, App Store Connect, JIRA, Agile

PROFESSIONAL EXPERIENCE

Android Developer | **Ahead Websoft Technologies Pvt. Ltd.** — ***Jul 2025 – Sep 2026 | Gurgaon, India***

ClubDunes | Social Community App · *Kotlin, Jetpack Compose, MVVM, Coroutines, Firebase, ExoPlayer* — Google Play

- Built a Kotlin and Jetpack Compose app for a Dubai-based community using MVVM, Hilt, Coroutines/Flow, and Retrofit for feeds, events, comments, and member profiles; live on Google Play with **100+ downloads** and a **5.0-star rating**.
- Optimized feeds with Paging 3 and Glide; built backend JSON-driven forms; integrated Infomaniak rich HTML editor.
- Integrated Google Sign-In, FCM, deep links, **Stripe**; handled signing, ProGuard/R8, Play Console, **GitHub Actions** CI/CD.

SocialEngine Mobile App [Flutter] | Social Networking Platform · *Flutter, Dart, REST APIs, Firebase* — Google Play | App Store

- Independently migrated the native Android (Kotlin) app to **Flutter**, rebuilding UI, navigation, and state management with full feature parity; live on both stores (**1,000+ downloads**, **4.3-star** rating, 54 reviews).
- Built the TikTok-style short-video (clips) feature and REST-driven activity feeds with Firebase Auth and FCM; wrote unit and widget tests (Flutter Test, Mocktail) to reduce regression risk.

SocialEngine Chat [Flutter] | Real-Time Messaging · *Flutter, Dart, Firebase, GetIt, MVVM* — Google Play | App Store

- Built a real-time chat app (MVVM, GetIt DI) with 1:1 and group messaging, 5 content types, and paginated history.
- Implemented read receipts, typing indicators, FCM push, and deep links with automatic login from the SocialEngine app.
- Mentored 2 junior developers through code reviews and onboarding.

Android Developer | **I-Next Web Technologies Pvt. Ltd.** — ***May 2024 – Jul 2025 | Chandigarh, India***

HappyTask | Service Booking Platform · *Kotlin, Jetpack Compose, WebSockets, REST APIs* — Google Play

- Built and shipped the service-booking app in Kotlin and **Jetpack Compose** across 15+ service categories; redesigned the booking UI flow and integrated booking and service data through REST APIs.
- Replaced periodic polling with a **WebSocket** connection for real-time notifications without redundant polling requests; added deep linking to open service screens from links; fixed production crashes using Firebase Crashlytics reports.

GreenRide Africa [Flutter] | Ride-Hailing & Mobility App · *Flutter, Dart, REST APIs, Google Maps* — Google Play | App Store

- Built live driver tracking, upfront fare estimates, and Google Maps-based ETA monitoring for the rider experience.
- Implemented REST-driven booking, trip management, and Stripe payment integration; app has 5,000+ downloads.

Freelance Android & Flutter Developer — ***Feb 2024 – Apr 2024***

- Shipped **4-5 client apps** to Google Play, incl. Trixie Pics (surveillance) and Funzo (book reading), plus bug fixes and support.

Android Developer | **I-Exceed Technology Solutions Pvt. Ltd.** — ***Feb 2022 – Jan 2024 | Bengaluru, India***

Appzillon | Digital Banking / Low-Code Platform · *Kotlin, Java, Firebase, Espresso, JUnit*

- Delivered **Android 14 compatibility** updates for the Appzillon IDE's Camera and File Operations modules; built Photo Picker, barcode scanning, SIM binding, SMS, and universal deep linking features in Kotlin and Java.
- Implemented Network, SMS, and GPS listeners; wrote Espresso and JUnit tests and resolved **30+ UAT and production defects** across Local, UAT, and Production builds delivered via GitHub Actions CI/CD pipelines.

EDUCATION

B.Tech, Information Technology | **Ajay Kumar Garg Engineering College, Ghaziabad** — ***Aug 2017 – Sep 2021***
