PROFESSIONAL SUMMARY

Android Developer with **4.5+ years of Android experience** building and maintaining production mobile applications across social media, fintech, and enterprise domains. Strong expertise in Kotlin, Java, Android SDK, Jetpack, Android architecture (MVVM, Clean Architecture), background services, REST APIs, real-time communication, and payment integrations. Owns features end-to-end, from requirements through testing and Play Store release, and has mentored 2 junior Android developers. Delivered production Android apps across multiple device types, with **10+ applications published on the Google Play Store** (worked on 8 of them; contributed to and released the rest). Also brings **2.3+ years of Flutter experience** as a secondary cross-platform skill, including an end-to-end Kotlin-to-Flutter migration of a social networking app shipped to Google Play and the App Store.

TECHNICAL SKILLS

Native Android: Kotlin, Java, Android SDK, Jetpack (Compose, ViewModel, LiveData, StateFlow/Flow, WorkManager), Coroutines, XML/ViewBinding, Material 3, Background & Foreground Services, Deep Linking, WebView, CameraX, Camera2, ExoPlayer

Architecture: MVVM, Clean Architecture, Repository Pattern, Dependency Injection (Hilt), SOLID, OOP

Backend / APIs: REST APIs (Retrofit, OkHttp), Firebase (Auth, Firestore, Realtime Database, Analytics), WebSockets, FCM, Crashlytics

Payments: Stripe, In-App Billing (Google Play Billing)

Testing: JUnit, Espresso

Flutter (Secondary): Flutter, Dart, Provider, Riverpod, Bloc, GetIt, Flutter Test, Widget Testing, Mocktail

Integrations: Push Notifications (FCM), Google/Facebook Login, Localization, AdMob, Google Maps SDK, Custom Chrome Tabs

Tools & Deployment: Agile/Scrum, JIRA, Git, Postman, Gradle, Google Play Console, App Store Connect, CI/CD (GitHub Actions)

PROFESSIONAL EXPERIENCE

Android Developer | Ahead Websoft Technologies Pvt. Ltd.

Jul 2025 – Present | Gurgaon, India

- Mentored and guided 2 junior developers on Android development.

ClubDunes – Social Community App – Android (Kotlin), Firebase Realtime Database, MVVM, Coroutines, ExoPlayer Play Store

- Built a Dubai-based social community app for sports and events in Kotlin, with real-time posts, comments, and interactions on Firebase Realtime Database; restructured queries to keep feeds and event listings responsive under concurrent reads/writes. Structured with MVVM and Coroutines for a clean, maintainable codebase. **100+ downloads, 5.0-star rating on Google Play.**
- Implemented the event booking module (event listings, join/RSVP flows, member profiles).
- Implemented in-app video playback using ExoPlayer.
- Added deep linking, embedded WebView content, and Custom Chrome Tabs for Stripe payment flows.

SocialEngine Mobile App – Social Networking Platform – Flutter, Dart, Firebase, REST APIs, MVVM, Provider, Riverpod Play Store · App Store

- Independently led the native Android (Kotlin) to Flutter migration of this social networking app end-to-end — rebuilt UI, navigation, and state management with full feature parity; shipped to Google Play and the App Store. **1,000+ downloads, 4.3-star rating across 54 reviews.**
- Built a TikTok-style short-video (clips) feature in Flutter.
- Integrated REST APIs and Firebase for content sharing, activity feeds, and real-time engagement modules; reduced regression risk with unit and widget testing (Flutter Test, Mocktail).

SocialEngine Chat – Social Media Messaging – Flutter, Dart, Firebase, REST APIs, GetIt, MVVM Play Store · App Store

- Built a real-time chat app (MVVM) for 1:1 and group messaging across 5 content types, with upload/download progress, read receipts, typing indicators, and paginated history.
- Applied GetIt dependency injection; integrated REST APIs and Firebase for auth and push notifications, with deep links opening the relevant chat and automatic login from the SocialEngine app.

Android Developer | I-Next Web Technologies Pvt. Ltd.

May 2024 – Jul 2025 | Chandigarh, India

HappyTask – Service Booking Platform – Android (Kotlin), Jetpack Compose, WebSockets, REST APIs, Deep Linking Play Store

- Architected and shipped the app end-to-end across 15+ service categories; **cut booking completion time by 40%** by redesigning the booking UI flow and optimizing API pipelines.
- Cut notification latency by 90%** by replacing polling with a WebSocket-based push system, and added a deep-linking layer for third-party navigation into specific service screens. Built in Kotlin and Jetpack Compose with REST APIs; live on the Play Store.

- TixiePics – Automated Interval Camera** – Android (Java), CameraX, Camera2, AlarmManager, BroadcastReceivers, Google Drive API, Dropbox SDK
- Built an automated interval-based photo capture app using CameraX, Camera2, AlarmManager, and BroadcastReceivers.
 - Implemented automatic cloud image uploads (with image metadata) via Google Drive API and Dropbox SDK; added admin-panel remote configuration of camera and capture settings.
- BaOui – Language Learning Platform** – Android (Kotlin), Firebase [Play Store](#)
- Grew the app to **1,000+ downloads across 30+ languages**, shipping listening, reading, and review/recall practice modules.
 - Used Firebase for dynamic content delivery, enabling curriculum updates without a new app release.
- GreenRide Africa – Ride-Hailing & Mobility App** – Flutter, Dart, REST APIs, Google Maps, Real-Time Tracking [Play Store](#) · [App Store](#)
- Scaled a cross-platform ride-hailing app to **5,000+ downloads** — pickup/destination selection, upfront fare estimation, live driver tracking, and Google Maps-based ETA monitoring.
 - Delivered REST API-driven auth, booking, pricing, and trip management, trip-sharing safety features, cash and mobile money payments (MTN, Airtel), and localization in English, French, and Kinyarwanda.

Android Developer | I-Exceed Technology Solutions Pvt. Ltd. Feb 2022 – Jan 2024 | Bengaluru, India

- Appzillon Digital Banking / Low-Code Platform** – Android (Kotlin, Java), Appzillon Framework, Firebase, Espresso, JUnit
- Implemented **Android 14** compatibility updates for the Appzillon IDE, including Camera and File Operation modules.
 - Built Photo Picker, Barcode Scanning, Camera, and File Operations features using Java and Kotlin.
 - Integrated SIM Binding, SMS, and SIM information features for mobile network management.
 - Developed Universal Deep Linking for navigation between applications through links.
 - Implemented Network, SMS, and GPS listeners for real-time updates and background operations.
 - Implemented push notifications, WebView, AdMob, theme switching, Google Maps SDK, and Custom Chrome Tabs across multiple application workflows.
 - Wrote automated tests with Espresso and JUnit to improve application quality.
 - Delivered modules across Local, UAT, and Production environments in Agile sprints, from business requirements through deployment; **resolved 30+ UAT and production defects**.

EDUCATION

B.Tech, Information Technology – Ajay Kumar Garg Engineering College, Ghaziabad 70.63%	Aug 2017 – Sep 2021
Intermediate (12th) – National Institute of Open School, Gorakhpur 72.20%	Jul 2016 – Jul 2017
SSC (10th) – RAMPUS, Gorakhpur 85.50%	Jul 2013 – Jul 2014
